Github: <https://github.com/MuhammadTalha-21>

Home: Darman Road Shakargarh District Narowal, 51800 Shakargarh (Pakistan)

EDUCATION AND TRAINING

Matriculation

Dream Public School, Shakargarh [28/02/2019 – 30/06/2021]

FSc. Pre Engineering

Paradise College, Shakargarh [31/07/2021 – 30/06/2023]

BS Computer Science

University of Narowal [10/2023 – Current]

City: Narowal

Graphic Designing

SKILLS

Microsoft Office / Social Media Marketing / C++ / SQL / Python / Graphic Design / Microsoft Word / Microsoft Excel / Autopsy digital forensics

LANGUAGE SKILLS

Mother tongue(s): Urdu

Other language(s): English

PROJECTS

[03/2026 – 06/2026]

AI-Powered Smart Blind Assistant (Machine Learning) <https://github.com/MuhammadTalha-21/Smart-Blind-Assistant-Using-YOLOv8>

- Developed an intelligent assistant using **Machine Learning** to aid visually impaired individuals in real-time navigation.
- Integrated **computer vision** capabilities to detect objects and obstacles, providing audio-based feedback to the user.
- Designed an efficient model to process sensor data, ensuring low-latency response for enhanced user safety and mobility.

[03/2026 – 06/2026]

CND Real-Time Bank Transaction Processing (Advanced Database Management System) <https://github.com/MuhammadTalha-21/CND-Real-time-banking-process>

- Designed a secure relational database using **MySQL** to manage accounts, transactions, and user authentication.
- Implemented **Stored Procedures** and **Triggers** to ensure atomic fund transfers, automated balance updates, and comprehensive audit logging.
- Optimized database performance and query speed through **B-Tree indexing** and execution plan analysis.

[09/2025 – 02/2026]

Brainify (Android App Development) <https://github.com/MuhammadTalha-21/Brainify-Android-App>

- Proficient in building scalable mobile applications using **Java**, **Kotlin**, and the **Android SDK**.
- Designed and developed **Brainify**, an interactive learning platform featuring MCQ-based assessments and structured subject-wise content.
- Strong focus on **user-centric design** principles to enhance engagement and provide intuitive mobile experiences.
- Experienced in collaborating with cross-functional teams to deliver innovative, impactful, and user-centric mobile solutions.

[03/2025 – 06/2025]

Hospital Management Network Architecture (Computer Networks) <https://github.com/MuhammadTalha-21/Hospital-Network-Project>

- Designed and configured a robust network infrastructure for a Hospital Management System using **Cisco Packet Tracer**.
- Implemented **VLANs (Virtual Local Area Networks)** to segment hospital departments (e.g., Doctors, Administration, Patients) for enhanced security and traffic management.
- Configured network policies to ensure data isolation between critical departments, reducing broadcast traffic and improving overall network efficiency.

[02/2025 – 05/2025]

Airline Management System (Database Management System) <https://github.com/MuhammadTalha-21/airline-management-system>

- Designed and implemented a robust relational database for an **Airline Management System** using **MySQL**.
- Leveraged **XAMPP** to ensure efficient database administration, deployment, and local server management.
- Engineered a comprehensive system to manage complex datasets, including real-time flight schedules, airport logistics, and passenger information.
- Developed key modules for dynamic flight status tracking and centralized passenger data management to enhance operational efficiency.
- Demonstrated strong capability in architecting database solutions and developing data-driven applications.

[02/2024 – 05/2024]

Balloon Shooter Game (Assembly Language) <https://github.com/MuhammadTalha-21/Balloon-shooting-game>

- Developed a 2D Balloon Shooter game using **x86 Assembly**, demonstrating low-level programming proficiency.
- Utilized **DOS interrupts** and **memory-mapped graphics** to handle direct hardware interaction and visual rendering.
- Implemented high-performance algorithms for real-time input handling, precise collision detection, and dynamic score tracking.
- Showcased a deep understanding of assembly language architecture and resource-constrained environment optimization.

[10/2025 – 02/2026]

Cloud Distributing computing simulation (Node Crash Handling) <https://github.com/MuhammadTalha-21/Cloud-Distributed-Computing-Simulation>

- Designed a fault-tolerant distributed system in **C++** to optimize task scheduling and workload management.

- Engineered an automated recovery mechanism that migrates pending tasks to healthy nodes upon failure detection.
- Implemented a load-aware balancing algorithm in main.cpp to ensure efficient distribution of diverse computational tasks.

WORK EXPERIENCE

Digital Skillhaus

Social Media Marketing

4 Years of Experience

- Handled end-to-end social media marketing
- Creating content, running paid campaigns, and analyzing insights to boost audience growth and engagement.

International Computer College & IT, Shakargarh

Computer Lab Attendent

- Supervised computer lab operations
- Maintained hardware/software systems
- Provided technical assistance to students ensuring smooth academic activities.

Digital Skillhaus

Graphic designer

4 Years of Experience

- Created visual designs and branding assets for digital and print media
- Ensuring alignment with brand guidelines and improving user engagement.

PERSONAL SKILLS

Time Managment

Team Leadership

Project Planning

Analytical Thinking Skill
